Royston Cabinet System Illustration

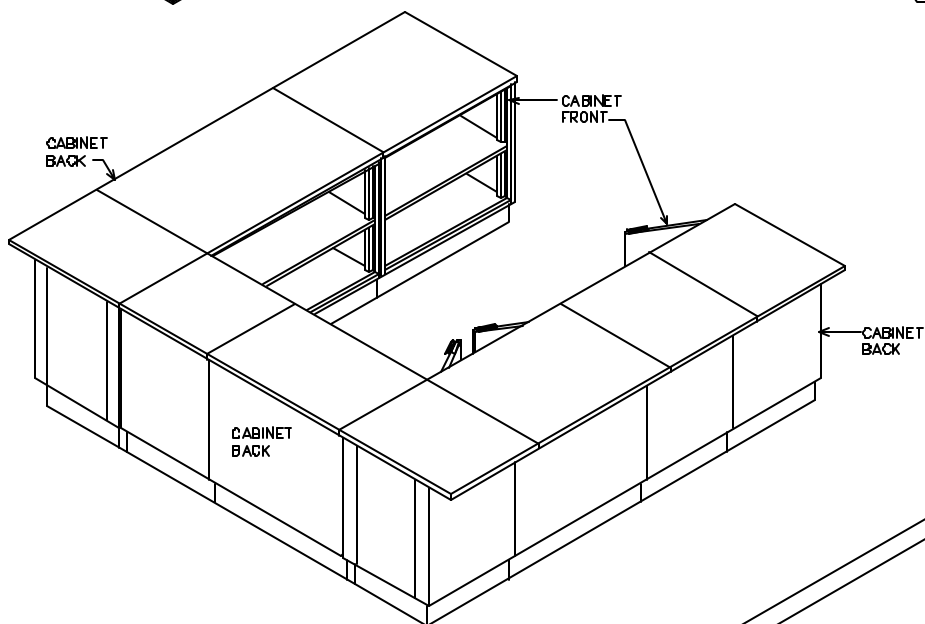

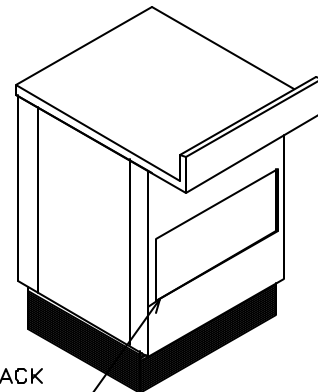

CABINET FRONT/BACK ILLUSTRATIONS

CABINET FRONT ALWAYS HAS OPENING WITH SHELF, DOOR, ETC. CABINET FRONT CAN FACE THE CUSTOMER OR THE CLERK

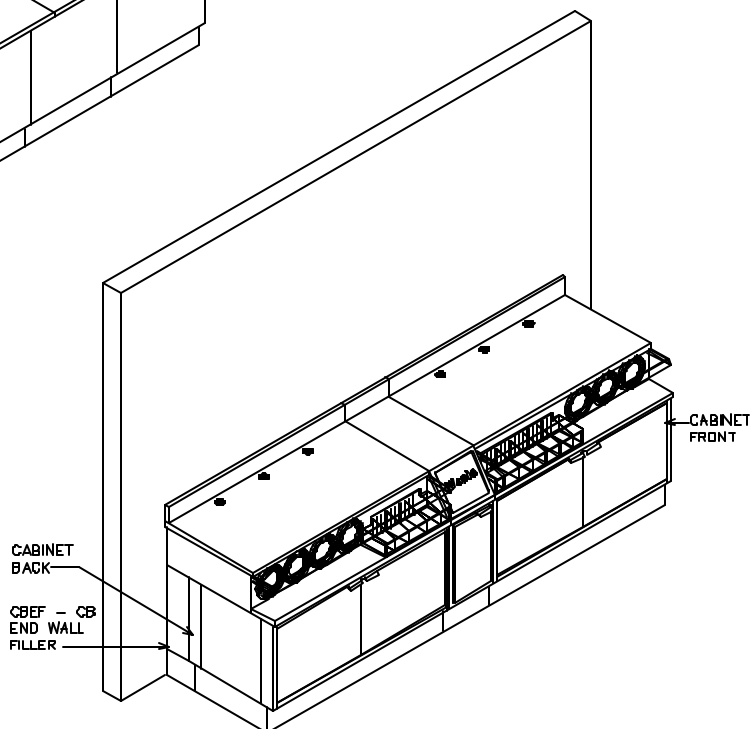

CABINET BACK HAS CLOSED OR OPEN BACK. CLOSED BACKS WILL FACE THE CUSTOMER AND OPEN BACKS WILL FACE A WALL.

SALES COUNTER

All references to LH, RH, top overhang direction, assume you are standing in front of the cabinet front.

BEVERAGE COUNTER

Ordering Royston Convenience Store Products

Royston offers a great variety of sizes, styles, and colors of fixtures to meet the needs of the convenience store operator. All of these products are built-to-order, giving the customer the most options for both function and appearance. Following the procedure shown below will ensure that you order the right products for your customer's needs and that Royston can promptly manufacture and ship your order. Leaving out any piece of information means we cannot proceed with your order because we won't know what to build! Clear product definition on the front end pays off in the long run.

Preliminary – Getting off to a Good Start

Start with a scale drawing of the store and equipment layout. It is important to know how fixtures are positioned relative to each other and to walls, doorways, etc. This also determines where fillers are needed.

Pick a starting point, such as the top left of the drawing or some other meaningful location in the store. Number the different items on the drawing from left to right and top to bottom (clockwise), completing one area at a time (i.e. Sales Counter, Fountain Area, Coffee Bar, Merchandising Systems, etc.) If exactly the same item is used more than once in a section, then use the same item number for each occurrence. We will methodically work our way through each section, one at a time.

Section 1 – Ordering Counters

Step 1 – Define Common Attributes

Identify the first area (i.e. Beverage Bar) and list its common attributes. These are:

- Cabinet Color
- Door Laminate Color/Pattern
- Base or Legs
- Base Color, if applicable
- Top Material (Stainless, Powder Coated Steel, Laminate, Solid Surface) and specific color/pattern for all but Stainless Steel.
- Other top attributes, such as Backsplash vs. Flat tops, Penetrations vs. No Penetrations.
- Any other common attributes (Stripes,,)

Step 2 – Specify Each Cabinet

Starting with the first cabinet in each section, identify and record the catalog no., width, depth, and height of the cabinet. Next record the style of cabinet (Door, 1 Drawer, Straight Waste, etc.) as well as Open or Closed Back. Use the Royston coding structure when recording this information. Be sure to identify any exceptions specific to individual components of this section (i.e. special top cut-out, fillers, etc.)

Step 3 – Specify the Top

Identify the size (width and depth) top it should receive and record this in the space provided. Most tops will be modular tops and be the same width as the cabinet. If a top is shared by more than one cabinet (what we refer to as a “common top”), indicate the top size up to a maximum 96” wide and draw a bracket around the cabinets that will be under the common top. These should always be listed in order from left to right and use the Royston coding structure. An “Extended Top”, which is a top wider than the cabinet underneath, is specified the same way. Be sure to list any filler required under the extended top.

Step 4 –Quantity

Record the quantity required for that exact cabinet/top combination.

Step 5 - Repeat

Repeat for each cabinet in this section, until the section is complete.

Step 6 – Identify Accessories/Add-on’s

List any add-on items, such as Modular Skirts, Merchandising Systems, extra Adjustable Shelves, and Pull-out Bins for this section in the Accessories/Add-ons section. Be sure to identify sizes for each.

Step 7

Go to the next section and repeat steps 1 – 5.

Section 2 – Ordering Shelving/Merchandising Systems

Step 1

Identify the first area and list its common attributes. These are typically:

- Merchandising System Family (Modular Merchandising System, Gondola System, Specialty Shelving System)
- Gondola/Shelving Color
- Base/Kickplate Color, if applicable.
- Back Material (Pegboard, Solid, Slatwall) and specific color/pattern if applicable.
- Other attributes, such as Aluminum Inserts in Slatwall.
- Any other common attributes (Color Price Tag Molding Insert Strips,,)

Step 2

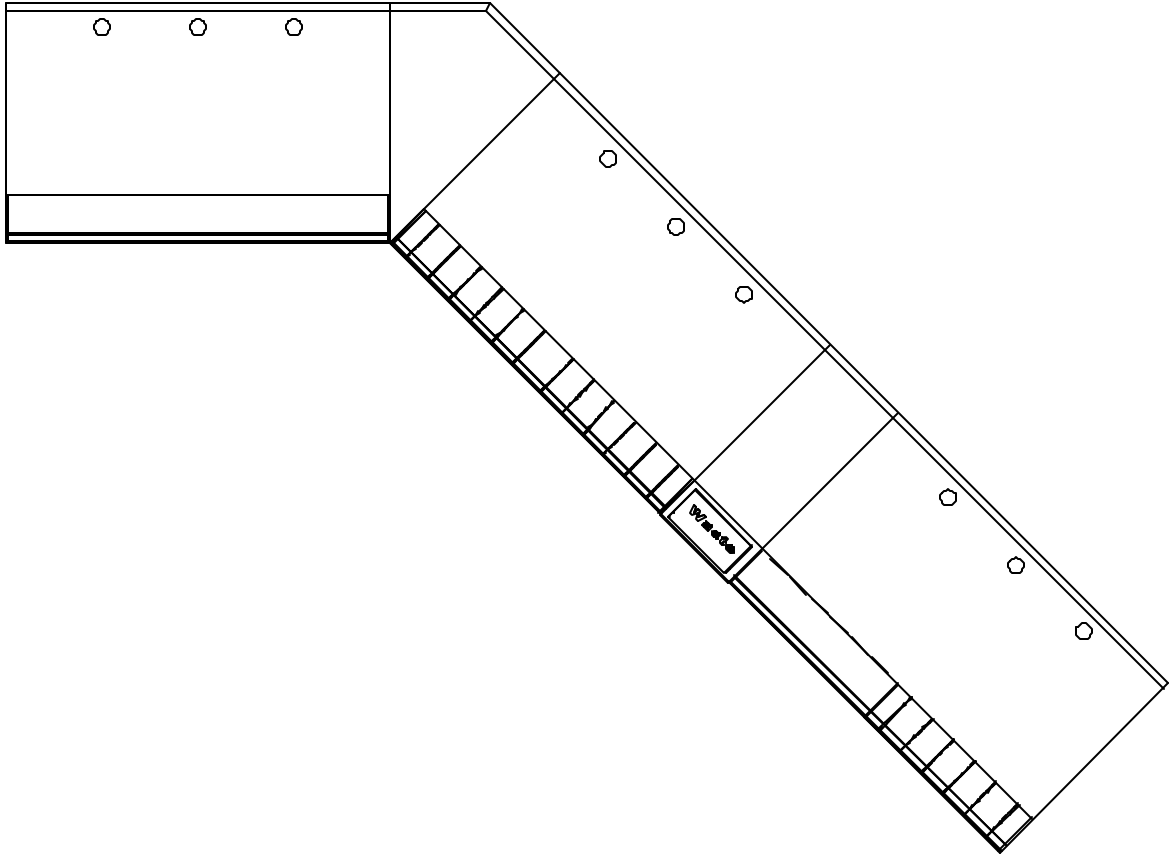

Starting with the first unit in each section, identify and record the width, depth, and height of each gondola, wall, or end unit. Next record the type (metal or wire), size (width x depth) of each shelf and the quantity required. Use the Royston coding structure when recording this information.

Step 3

Repeat for each shelving section, until complete.

ROYSTON® COUNTERTOP FEATURES and BENEFITS

Royston Design Feature	Customer Benefit
<p>Counter Top Construction</p> <p>The top is an integral part of a Royston counter. The top makes the counter complete and functional – in fact, the top selection is really the key to making it do what you need it to do. Royston builds its tops in-house. What’s more, they are all designed specifically for use in convenience stores, so they will stand up to the harsh environment.</p>	<p>Genuine Royston tops are renowned for their durability and good looks. We offer several options in size and material, and all except Stainless Steel have numerous color options as well– one of these is sure to be right for your store.</p>
<p>Laminate Tops</p> <p>Design and Construction</p> <p>There are several things that make the Royston Laminate Top the best laminate top:</p> <ul style="list-style-type: none"> • The substrate of a Royston Laminate Top is 3/4" thick particleboard, which provides the strength to support countertop equipment. • Aluminum panels (.020" thick) are bonded to both sides of the particleboard to provide an effective moisture seal and additional strength. • The laminate cover is then bonded over one side of the particle board/aluminum substrate “sandwich”. • An anodized aluminum edge binder is added to greatly reduce the possibility of edge chipping. • Add-on painted metal backsplashes (4" high) are available. 	<p>Choose Royston Laminate Tops for:</p> <ul style="list-style-type: none"> • Adding a variety of colors and patterns to a counter top. • Use in Sales Counters, where extreme moisture is not an issue. • Generally the lowest cost top alternative. • An extremely well constructed, durable laminate top.  <p>The diagram illustrates the cross-section of a Royston laminate top. It shows a central layer of 3/4" Particle Board. On both the top and bottom surfaces of this board, there are thin layers of Aluminum Panels. A Laminate layer is applied to the top surface of the top Aluminum Panel. Along the left edge, an Anodized Aluminum Binder is applied to the edge of the top Aluminum Panel.</p>

<h2 data-bbox="178 282 697 334">Stainless Steel Tops</h2> <p data-bbox="178 342 562 375">Design and Construction</p> <p data-bbox="178 380 1192 448">There are several things that make the Royston Stainless Steel Top the best stainless steel top:</p> <ul data-bbox="178 456 1192 899" style="list-style-type: none"><li data-bbox="178 456 1192 561">• The substrate of a Royston Stainless Steel Top is ¾” thick particleboard, which provides the strength to support countertop equipment.<li data-bbox="178 570 1192 675">• An aluminum panel (.020” thick) is bonded to one side of the particleboard to provide an effective moisture seal and additional strength.<li data-bbox="178 683 1192 751">• The stainless steel cover (.037” thick) is then bonded over the other side of the particle board/aluminum substrate “sandwich”.<li data-bbox="178 760 1192 828">• A combination of stainless steel, aluminum, and silicone completely seal this top from moisture and vermin.<li data-bbox="178 836 1192 899">• Available with or without integral backsplashes (4” high). Add-on backsplashes (also 4” high) are also available.	<p data-bbox="1247 282 1881 315">Choose Royston Stainless Steel Tops for:</p> <ul data-bbox="1247 323 1923 578" style="list-style-type: none"><li data-bbox="1247 323 1923 391">• The ultimate is strength and worry free durability.<li data-bbox="1247 399 1923 467">• Wet (fountain, coffee, etc.) applications in addition to sales counters.<li data-bbox="1247 475 1923 544">• Food prep areas where maintaining sanitary conditions is essential.<li data-bbox="1247 552 1923 578">• A high value, moderate cost.  <p data-bbox="1291 581 1768 997">The diagram is a cross-sectional view of the countertop assembly. It shows three distinct layers. The top layer is a thin, solid line labeled 'STAINLESS STEEL COVER'. Below this is a thicker layer with diagonal hatching, labeled '3/4\" PARTICLE BOARD'. The bottom layer is another thin, solid line labeled 'ALUMINUM PANEL'. On the left side, there is a vertical L-shaped profile representing a backsplash, which is bonded to the aluminum panel. Arrows point from the text labels to their respective layers in the diagram.</p>

ROYSTON® COUNTERTOP FEATURES and BENEFITS

Royston Design Feature	Customer Benefit
<p>Powder Coated Steel Tops</p> <p>Design and Construction</p> <p>There are several things that make the Royston Powder Coated Steel Tops the best painted steel top:</p> <ul style="list-style-type: none"> • The substrate of a Royston Powder Coated Steel Top is ¾” thick particleboard, which provides the strength to support countertop equipment. • An aluminum panel (.020” thick) is bonded to one side of the particleboard to provide an effective moisture seal and additional strength. • The powder coated steel cover (.045” thick) is then bonded over the other side of the particle board/aluminum substrate “sandwich”. • A combination of steel, aluminum, and silicone completely seal this top from moisture and vermin. • Available with or without integral backsplashes (4” high). Add-on backsplashes (4” high) are also available. 	<p>Choose Royston Powder Coated Steel Tops for:</p> <ul style="list-style-type: none"> • The ultimate in strength; comparable to a stainless steel top. • A relatively inexpensive way to add color to an extremely rugged counter top. • Wet (fountain, coffee, etc.) applications. • Food prep areas where maintaining sanitary conditions is essential. • High value, moderate cost. • An extremely durable finish. A resin powder is sprayed onto the electro-statically charged steel cover. The electrostatic charge attracts the powder particles to the steel surface, which is then baked at a high temperature to fuse the powder resin to the steel, providing an unusually durable finish. <p>Not for use in a sales transaction area.</p>

ROYSTON® COUNTERTOP FEATURES and BENEFITS

Royston Design Feature	Customer Benefit
<p>Solid Surface Tops</p> <p>Design and Construction</p> <p>There are several things that make the Royston Solid Surface Tops the best solid surface top:</p> <ul style="list-style-type: none"> • The substrate of a Royston Solid Surface Top is 3/8" thick luan plywood. Available top support kits provide the strength to support almost any countertop equipment. • Aluminum panels (.020" thick) are bonded to both sides of the plywood to provide an effective moisture seal and additional strength. • The solid surface material cover (1/2" thick) is then bonded to the substrate using silicone adhesive. • A matte finish is provided for the solid surface material to minimize the effect of minor scratches. • Available with add-on (4" high) backsplashes.  <p>The diagram is a cross-sectional view of the countertop assembly. It shows a top layer of '1/2" SOLID SURFACE MATERIAL' with a '1/4" RADIUS' on its upper edge. Below this is a thin layer of 'ALUMINUM PANELS'. Underneath the aluminum panels is a thicker layer of '3/8" LUAN PLYWOOD'. Another layer of 'ALUMINUM PANELS' is shown at the bottom of the plywood substrate. Arrows point from the text labels to the corresponding layers in the diagram.</p>	<p>Choose Royston Solid Surface Tops for:</p> <ul style="list-style-type: none"> • The ultimate is upscale, high image counters. • Numerous available colors and patterns. • A seamless countertop. • Suitable for all areas of the store. • The ability to repair or refinish countertops should they become scratched or damaged. They can be made to look new again. • Your guarantee of superior performance in a solid surface top. <p>Royston works with all the major brands of solid surface material, including Avonite, DuPont Corian, Wilsonart Gibraltar, and Formica Surell.</p>

Royston Cabinet System – CS Series Open Back Dimensions

Most counters (18"–48") are available with an open back option. This provides access for electrical and plumbing lines when a counter will be located against a wall.

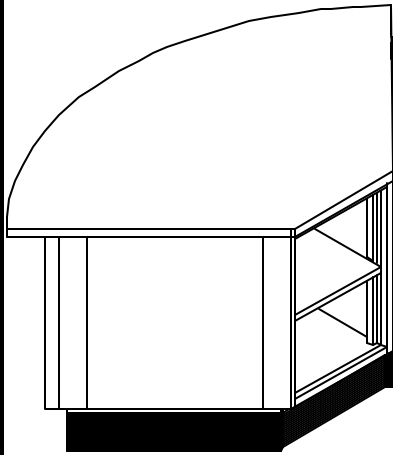

A cover plate can be purchased when health departments require counters to be closed. (See Parts and Accessories)

All open backs in counters are the same distance from the floor. Opening sizes are all 10" high. Openings are 1" from each side.

Royston Cabinet System CM – Counter Merchandising Options

ATTACHING FRAMES – Merchandising frames are designed to bridge various sized cabinets. First determine the overall length of a merchandising run on the sales counter, then decide the most efficient way to merchandise it. For instance, a 12' run could consist of (3) 48" "frames", even though the cabinets are different lengths.

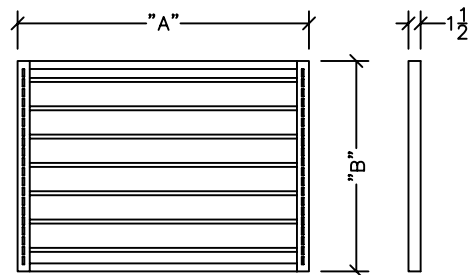

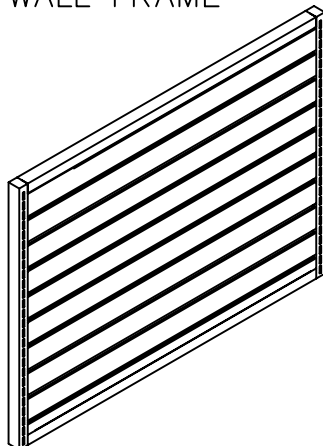

OF – OPEN FRAME

ATTACHING FRAMES – Frame kits include both style mounting brackets

OVERHANG TOP MOUNT

FLUSH TOP MOUNT

INSTRUCTIONS

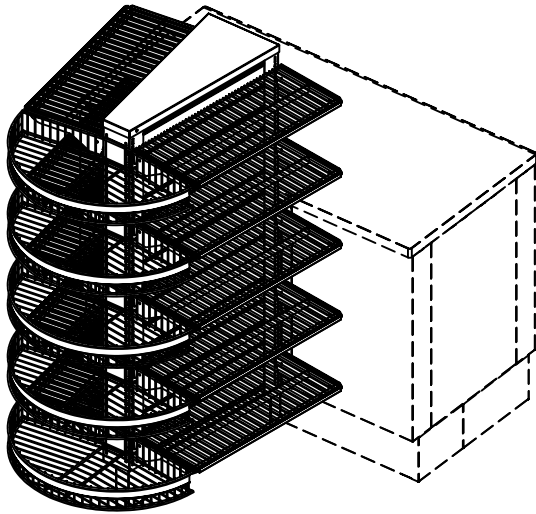

- 1) Attach Velcro to cabinet and merchandising frame somewhere near the bottom of the frame
- 2) **OVERHANG TOP MOUNTING BRACKET** – Clip bracket under top rail of frame 2" to 6" from each end. Set bracket and frame on upper counter ledge (brackets may be positioned as needed to miss counter joints). Screw brackets to the top using a #10 sheet metal screw.

FLUSH TOP MOUNTING BRACKET – Set brackets 2" to 6" from each end of the merchandising frame and $2\frac{3}{16}$ " down from the upper ledge. (Brackets may be positioned as needed to miss counter joints). Drill (4) $\frac{5}{16}$ " dia. holes in counter. Screw brackets to cabinet using 1/4-20 screws and nuts. Slide top rail of merchandising frame over flush mounting brackets.

Open Back Dimensions

Most counters (18"–48") are provided with an open back. This provides access for electrical and plumbing lines. A cover plate can be purchased when health departments require counters to be closed. (See Parts and Accessories)

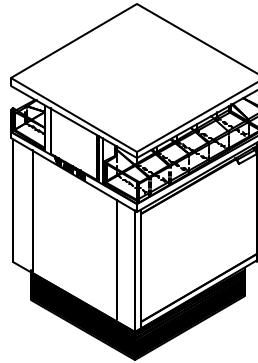

All open backs in counters are the same distance from the floor. Opening sizes are all 10" high. Openings are 1" from each side.

While it is our intent to provide accurate dimensional specifications to our sinks, these dimensions cannot be guaranteed. Sink colors are intended to complement sheet colors of the same name, however exact matches between sinks and sheets are not guaranteed. Aristech Acrylics LLC assumes no liability for the use of such information or for any damages incurred through its use or application.

WHY ROYSTON AND AVONITE?

Royston is pleased to feature Avonite as its **Preferred Solid Surface Provider**. During several years as a major Royston supplier, Avonite has proven time and time again that they provide:

- A top quality product.
- Very competitive prices.
- A wide variety of colors and patterns suitable for commercial applications.
- Exceptional Service.

ABOUT AVONITE

Avonite, Inc. enjoys its role as the innovative leader in the solid surface industry. They let your ideas surface, and provide solutions for all your needs. Avonite was the first company to:

- Introduce color to the solid surface industry.
- Introduce granite patterns in solid surface.
- Develop seaming techniques and adhesives making seams imperceptible.
- Market both polyester and acrylic solid surface products.
- Introduce large particulate product (Crystelle Collection).
- Offer “Green” product, comprised of prime materials that would otherwise be destined for a landfill.

ROYSTON SOLID SURFACE TOPS

Royston has engineered a solid surface top system that works as an integral part of the Royston counter. This system includes the design of the countertop as well as its interface with the cabinet. A unique structural Top Support System will be employed wherever heavy countertop loads are identified, such as in a fountain area. Royston has integrated solid surface top manufacturing into both of its manufacturing facilities, where we control design and fabrication to the same exacting standards as our traditional Stainless Steel and Laminate Tops.

Be sure a genuine Royston top is part of your Royston counter, and specify Avonite for your best value in a Royston Solid Surface Top.
